

Workwear Services | Standard Collection

Let the expert look after your company's workwear

Lindström is one of Europe's leading textile service companies. We are a global partner of companies, with operations in both Europe and Asia. It is our task to strengthen our customers' company image by means of textiles and cleanliness.

We have over 160 years of experience in the field. We have learned to listen to and understand our customer's line of business and the quickly changing needs. This is why we do not sell workwear, but offer workwear services according to the needs of the different fields of business our customers are involved with.

The Lindström total workwear service includes acquisition and rental of the clothes, their maintenance, transportation and replacement. The rental system offers companies a flexible, carefree and economic way of looking after their clothing and their care without committing capital and personnel resources. Thanks to our reliable and flexible service, our customers will have more time to concentrate on their own business activities.

Well selected and maintained workwear improves the company image

The workwear makes a statement about the company's way of operating and serving its customers. It strengthens the company image, both in the eyes of the customers and the staff. Well selected and maintained workwear also improves the staff's morale and adds to the team spirit.

Lindström is an expert on workwear, and with us the acquisition and maintenance of workwear is carefree. The durability of the materials, the quality of the work and the functionality of the clothing – without forgetting about the balance between price and quality – are clear to us. Our long experience as suppliers of workwear to the industrial and service sectors guarantees that our customers' workwear also fulfils the requirements imposed by work protection standards and legislation.

This is how Lindström workwear service works

Lindström workwear service is the easiest way to manage your company's workwear service. It is quick and flexible with many advantages. We believe, that best results in workwear maintenance can be achieved by co-operation. The under mentioned instructions ensure you an easy and functional workwear service.

■ Customer number

Every customer has its own customer number. It is found on every workwear and in every invoice. The customer number has to be mentioned in every customer contact.

■ Wearer list and person number

A list of wearers is made during the first fitting of workwear. Additional workwear orders are added to list by Lindström customer service. Personal garments are marked with a personal code. Code can contain letters and numbers and it can be twelve digits long at the maximum. If you have a locker service, garments are marked with a locker number.

■ Fittings and measurement modifications

After the collection is chosen, it is very important that every user fits his/her own garments. In connection of the first fitting measurement modifications, like shortenings, are defined. The smallest measurement modification is 5 cm. After that it is possible to make modifications at intervals of 1 cm.

■ Delivery of clean workwear

Clean garments are delivered once a week to an agreed place. Garments are also inspected and repaired or replaced in case of any exceptions with the agreed quality.

■ Packing of used workwear

We use textile laundry bags for used garments. The bag has to be closed carefully. Every bag must have an address label including the customer number.

The deliveries will run smoothly, if used garments are already packed on the previous day.

If you have run out of bags, you will get more from our service representative. You can also leave an order for bags at the place where used garments are picked up. If you have a locker service in use, used garments are picked up directly from the dispenser.

■ Additional orders of workwear

The most convenient way of leaving additional orders is through eLindström. You can also call, email or fax to our customer service. Please mention customer number, product number, size, person number/locker number, wearers name and number of garments in the additional order. We aim to deliver additional orders in one week.

■ Return of unnecessary garments

When employees leave the company, unnecessary garments have to be returned. For this purpose there is a plastic bag marked "Return of unneeded garments". Please write your customer number on the bag and attach a return receipt. Put the plastic bag to a pick up place on the previous evening of the weekly pick up.

■ Invoicing

Invoices are sent afterwards at four week intervals.

eLindström

- Open every day, around the clock

eLindström is Lindström's online service that enables you to easily browse our product selection, place orders and manage workwear services – all in one place. In eLindström, you can find pictures and detailed information on all our products, which makes selecting and ordering genuinely easy.

In eLindström, you can manage your services, place orders and follow up reports. To get the best benefits from Lindström's service solutions, make use of the eLindström online service. Our customer service will be happy to tell you more about the service and what it can offer.

We tailor-make our service according to the customer's needs

We have made it as easy and flexible as possible for our customers to procure workwear. The co-operation starts with an in-depth analysis of our customer's needs, where it is decided what kind of workwear is best suited for the company. At the same time we agree on the quantity of work clothing and how often it is to be exchanged, and dependent on this the washes, repairs, transportation, storage and replacement of clothing will be determined.

As workwear always is an individual item for its user, our first delivery of workwear is preceded by fitting and making the necessary changes. This is why we, in addition to marking each item with the company logo, also mark it with the name of the user.

As an additional service we offer lockers, that's to say, we deliver clean and maintained workwear, which we put into individual lockable lockers and consequently they stay tidy and in good order.

Locker service as an additional value

Locker service guarantees that each worker has clean garments for his own size and for his duties in his own locker. With our 5 or 10 compartment locker and personal keys users have easy access for their individual garments without confusion and garment losses. After changing clean garments users put garments for washing into the collector locker, from where our service representative collects them for maintenance. Locker service is an easy way to keep premises neat and clean.

Locker size:

- Height 186 cm
- Width 38 cm
- Depth 46 cm

Choice of 5 and 10 user lockers and also a locker for used workwear. Individual compartments are lockable. Clean workwear are delivered to individual compartments.

Items of clothing needed

Based on the number of weekly changes and work tasks, we allocate for your company's staff a sufficient number of individually marked clothing.

Changes per week	In use	Spare	In wash	=	Items of clothing needed
1				=	3 
2				=	5 
3				=	7 
5				=	11 

Our workwear collection dresses different fields of business

When planning our collection we have taken into consideration the needs of different fields of business – both appearance, which is accentuated in the service sector, the safety required in heavy industry, and the requirements for both indoor and outdoor work. Our product range also covers protective clothing that protects both the employees and the production process and the end product. That's why you can be assured that from our versatile collection the right solution will be found for your company's workwear needs.
